### Calder GP Practice

**Service:** Calder Community GP Practice

#### **Service overview**

Calder Community Practice is located on the second floor in the Todmorden Health Centre, Todmorden bus services and train station are within 5 minutes walking distance. There is some freecar parking available in and around the centre. If parking on site car registration details must be recorded as there is a time limit on the use of the parking area.

All doctors, advanced nurse practitioners, practice nurses and staff are committed to providing you with an outstanding, family-friendly service.

We are part of Locala Community Partnerships, a community interest company providing health services in Kirklees, Calderdale and Bradford. We are not for profit organisation with both staff and community members.

There is also lots of information for patients on the Locala website: [www.locala.org.uk](http://www.locala.org.uk) including how to become a community member.

The practice also hosts the Calderdale walk-in-service on weekends and bank holidays.

## Calderdale Youth Justice Service

### Service: Kirklees and Calderdale Youth Justice Services

#### Service overview

Our specialist nurses work with young people aged between 10 and 18 who are already involved with either the Kirklees or Calderdale Youth Offending Teams.

The aim of the service is to promote health and wellbeing and contribute to the prevention youth crime in these areas.

This is achieved by offering:

- Confidential\* health care and support
- Assessment of the physical, mental and social needs of this vulnerable group
- An opportunity to work with individuals or groups of vulnerable young people.
- Health education / information to young people, families, carers and other interested parties
- Support through referrals and signposting to other services.
- An advocacy role on behalf of the young people.
- Providing health information to inform reports for Court, the secure estates and other relevant parties.
- Promotion of other health services including Chlamydia screening, condom distribution, Teenlifecheck and childhood immunisation programmes.
- Collaborative working with colleagues within and outside the criminal justice and health services.
- A contribution to the planning of care to reduce risk and vulnerability to the young person and the public

\* adhere to Kirklees and Calderdale Safeguarding Children Board procedures.

#### Mental Health

Mental health problems can affect 1 in 10 children and young people. They include depression, anxiety and conduct disorders and are often in response to what is happening in their lives.

Emotional health is just as important as physical health.

Support for mental health is available for young people known to the Youth Offending Teams, through this service.

<b>Contact details</b>	The specialist nurses can be contacted as follows: South Kirklees: 01484 226263 North Kirklees: 01924 482118 Calderdale: 01422 368279

## Community TB Nursing Service

<b>Service: Community TB (Tuberculosis) Nursing Service</b>
---

<b>Service overview</b>
-------------------------

Our Community TB (Tuberculosis) service provide a well-led, high quality specialist nurse led TB service for individuals and families with Tuberculosis. We collaboratively work with a wide range of professionals, including consultant in Respiratory Medicines, Consultant Paediatrician, GP practices, child health services, Public Health England (PHE) Yorkshire and Humber, NHS England, Walk in centres, Infection Prevention Control, Microbiology, Occupational Health (for contacts of health and social care professionals), KIRKLEES Council Public Health, drug and Alcohol treatment services in Kirklees.

We support in the early diagnosis of TB cases, prevention and early detection of transmission, treatment compliance of active disease, detection of Latent Tb infection and prevention of reactivation of TB and management of TB incidents /outbreaks in the community.

We are responsible for assessing, planning, implementing and evaluating highly specialist holistic care and treatment for Patients requiring TB treatment.

We provide evidence based holistic care approach to meet the local and individual needs to support them in managing their TB diagnosis and treatment regime, monitoring compliances, outcomes to improve quality of care, prognosis and reduce recurrence of TB and drug resistance.

We are actively involved in programmes of health education and health promotion which involves patient with TB, suspected TB and their contacts appropriately in decision making in order to protect the Public health.

What we do:

- Risk assessment of all TB cases for enhanced case management.
- Support for TB patients on treatment, including enhanced case management from the use of treatment aids up to and including Directly Observed Therapy (DOT).
- Contact tracing to limit onward transmission from an index case to close contacts (in line with current NICE guidance).
- New entrant TB screening in the community for identified residents from high TB incidence countries as recommended by NICE guidance and the Collaborative Tuberculosis Strategy for England: 2015 to 2020.
- To increase the timely detection and treatment of Latent TB infection in high risk and underserved groups in Kirklees.
- BCG vaccination clinic for eligible neonates and pre-school and school children identified through referrals received from health professionals (that are not covered in the secondary care maternity specification).
- TB incident/outbreak management.
- Community outreach.
- Raising awareness in the local population, with high risk groups and with health care provider, in partnership with Public Health.
- To work in partnership with other service providers on the management of TB patients, i.e. respiratory consultant and the wider health and social care system (housing).
- Participate regularly (at least quarterly) in full Multi-Disciplinary Team meetings to review case load management.
- Participate in TB Cohort Review, including preparation of the required paperwork defined by PHE, attendance at Cohort Review meetings and implement recommendations from TB Cohort Review.

<b>Contact details</b>	<p>In North Kirklees the Community TB Service is based at Dewsbury Health Centre, Wellington Road, Dewsbury, WF13 1HN.</p> <ul style="list-style-type: none"> <li>• Jayne Burnett, TB Nurse Specialist, Team Leader</li> <li>• Lynne Woolven, TB Nurse Specialist</li> <li>• Fatima Patel, Bilingual Support Worker</li> </ul> <p>In South Kirklees, the Community TB Service is based at Princess Royal Health Centre, Greenhead Road, Huddersfield, HD1 4EW.</p> <ul style="list-style-type: none"> <li>• Deborah Howgate, TB Nurse Specialist, Team Leader</li> <li>• Hiwot Hailu, TB Nurse Specialist</li> <li>• Alison “Jill” Hirst, TB Nurse Specialist</li> </ul> <p>TB office working days are Monday-Friday 9am-5pm (except weekend and bank holidays)</p> <ul style="list-style-type: none"> <li>• 0303 330 9869</li> </ul> <p>Or email us on <a href="mailto:LCP.kirkleestbservice@nhs.net">LCP.kirkleestbservice@nhs.net</a></p> <p>TB Admin Support Workers</p> <ul style="list-style-type: none"> <li>• Jacqueline Flanagan</li> <li>• Odelle Whitehead</li> </ul>
<b>Service locations</b>	<p>We provide home visits as per dynamic risk assessment and provide TB screening Clinics and follow ups at North Kirklees and South Kirklees on a weekly basis.</p>

## Contenance

### Service: Contenance Service and Colorectal & Stoma Service

#### Service overview

Our Contenance, Colorectal & Stoma Service is made up of a team of specialist nurses and health care assistants with expert skills in both the assessment and the treatment of bladder, bowel, colorectal, stoma and pelvic floor problems.

Working in partnership with our patients and their families our aim is to provide every patient with a holistic assessment, diagnosis and personalised treatment programme.

In most cases our treatment programmes will cure or improve the patient's condition and subsequent quality of life, making it possible for people to return to a full and active life that is right for them.

<p>Disposable containment products are prescribed as part of a personalised treatment programme and only when a continence condition is chronic and intractable.</p> <p>Individuals who are not eligible for the supply of NHS containment products, will be provided with the support and guidance needed to secure a suitable and cost effective containment method. We are also happy to provide Health Care Professionals with telephone advice:</p> <p><b>Please Note:</b> A specific request for telephone advice should be submitted via Single Point of Contact 0300 304 5555. A formal referral is not required.</p>

Desmond and Daphne – Desmond information to be added soon

<b>Service:</b> DAFNE Structured Patient Education Course
<p><b>Service Overview</b> DAFNE stands for <b>D</b>ose <b>A</b>djustment <b>F</b>or <b>N</b>ormal <b>E</b>ating. This course aims to help adults with Type 1 Diabetes lead as normal a life as possible, whilst also maintaining blood glucose levels within healthy targets, to reduce the risk of long-term diabetes complications. The DAFNE course is for adults (over 17 years old) with Type 1 Diabetes and is a comprehensive and often life-changing experience. It is far more than a carbohydrate counting programme, although learning and refining the skills necessary to count the carbohydrate in each meal and to inject the right dose of insulin are an important part of the course. There are different ways in which you can complete a DAFNE course, either on a face-to-face DAFNE course or</p>

virtually, on a Remote DAFNE course.

On a face-to-face course, you will attend a five-day training course (Monday to Friday, 9am-5pm), with a ½ day follow-up session around eight weeks after the course. There are sessions on managing insulin around exercise, around illness, and around social activities including drinking alcohol. This is why the course might be longer than other 'self-management' training you might have heard of.

The face-to-face structured teaching programme is delivered to groups of six to eight participants under the supervision of DAFNE-trained educators (who are specially trained NHS diabetes specialist nurses and dietitians).

The Remote DAFNE course has been created for people with Type 1 Diabetes who feel that a face-to-face DAFNE course is not for them and in response to changes in diabetes services as a result of the Covid 19 requirement for shielding and social distancing. By taking part in a Remote DAFNE course you can learn the DAFNE way of managing your Type 1 Diabetes from home. This might fit in better with your work and home commitments and you don't need to travel, eat outside your home or visit a hospital to take part in the course. The Remote DAFNE course will take 6 weeks to complete and again includes a ½ day follow-up session around eight weeks after the course. It includes online learning from home each week and weekly group video support calls with up to three other participants and a trained Remote DAFNE educator.

The DAFNE course, whether you attend a face-to-face or Remote DAFNE course, is about learning from experience, trying new things under supervision, and benefiting from the support of other people on the course with you. During the course you practise the skills of carbohydrate counting and insulin adjustment around lifestyle activities.

DAFNE allows you to fit diabetes into your lifestyle, rather than changing your lifestyle to fit in with your diabetes.

<b>Contact Details</b>	The service can be contacted Monday – Thursday from 08:15 – 15:45. Outside of these times an answer machine is in operation. We will return your call if you leave a message but please note this may not be the same day.  Please phone our dedicated phone line: 0303 330 9869 – option 3.
<b>Service Locations</b>	Princess Royal Health Centre Virtual platform for the Remote DAFNE Course, e.g. MS Teams etc.
<b>How to refer</b>	Referrals into a DAFNE course need to be made by a member of the Diabetes Specialist Services, e.g. Consultant in Diabetes, Diabetes Specialist Dietitian or Diabetes Specialist Nurse. GP and self-referrals are not accepted without the individual being assessed by a member of the Diabetes Specialist team first.
<b>Referral Criteria</b>	<b>Who can attend a DAFNE course?</b> Adults (>17yrs) with Type 1 Diabetes for at least 6 months or post-honeymoon phase <u>and</u> who are registered with a Huddersfield GP.. People using Multiple Daily Injections (MDI), or those willing to change from a twice daily insulin regimen to MDI. People willing to check their blood glucose (or using flash glucose monitoring) a minimum of 4 times per day.
<b>Useful Links</b>	For more information about DAFNE, please visit: <a href="https://dafne.nhs.uk/">https://dafne.nhs.uk/</a>
<b>CQC Rating</b>	GOOD

### Dental

<b>Service:</b> Dental	
<b>Service overview</b> Locala Dental Care is a unique service that provides specialist led NHS dental care and treatment for children and adult special care patients living in Calderdale and Kirklees. Our service user groups include adults who have:	

- moderate/severe and profound multiple learning disabilities;
- moderate/severe physical and/or communication impairment;
- moderate/severe chronic mental health conditions including dementia;
- complex medical conditions;
- people who require bariatric facilities (body mass index over 40).

For those people with a BMI between 30 and 40 there should be an additional health need, with the additional health need being the primary reason for referral.

We also provide specialist led paediatric dental services for children with:

- moderate/severe and profound multiple learning disabilities;
- moderate/severe physical and/or communication impairment;
- moderate or severe behavioural problems;
- severe dental anxiety or dental phobias;
- children in need and with child protection plans, with additional or complex needs;
- looked after children with additional or complex needs or complex social problems
- other additional needs such as substance misuse;
- clefts, abnormalities of dental development or dental trauma of increased complexity;
- other complex dental conditions.

We also provide the following services:

- Inhalation sedation in central clinics
- Home visits for housebound patients

All of our premises are fully accessible for patients with disabilities and two of our clinics have specialist bariatric equipment, and equipment to support patients in wheelchairs.

When a person is assessed as no longer requiring care with Locala Dental Care they will be discharged and signposted to seek continuing care in a general dental practice.

Further information about finding an NHS dentist is available on this page.

### **Out of Hours Dental Care**

If you are experiencing a dental emergency are not registered with; a general dental practice, with Locala or if you are experiencing problems outside of normal dental hours, please ring NHS111 for emergency advice and appointments. You can find out more about the NHS 111 service here.

Unfortunately, we are unable to provide treatment to adults and children who can be seen in a general dental practice.

<b>Contact details</b>	Locala Dental Care operate out of six clinics in Calderdale and Kirklees and can be contacted via telephone on: 030 3330 9750. This phone line is manned from 8:30am to 5:00pm, Monday to Friday. There is a voicemail function outside of these hours.
<b>Service locations</b>	<p>Kirklees:</p> <p>Holme Valley Memorial Hospital Princess Royal Community Health Centre Cleckheaton Health Centre Batley Health Centre</p> <p>Calderdale:</p> <p>St Johns Health Centre Todmorden Health Centre</p>

<b>How to refer</b>	<p>Referrals are accepted through the Locala website - <a href="https://www.locala.org.uk/your-healthcare/ereferrals-home/">https://www.locala.org.uk/your-healthcare/ereferrals-home/</a> and can be made by health, education or social care professionals. We are unable to accept self-referrals into Locala Dental Care.</p> <p>For General Dental Practitioners - all paediatric referrals now come via the Electronic Referral Management System ERMS. Please use the online referral on this site for adult referrals.</p> <p>For Dental Professionals referring in we employ the British Dental Association (BDA) Case Mix tool to ensure patients are appropriate for our service. For more information on how this is determined, please contact us or visit the BDA website.</p> <p>We are unable to provide treatment to adults and children who can be seen in a general dental practice.</p>
<b>Referral Criteria</b>	As above. Nb. If the person doesn't have a dentist, but would be unable to be seen in the general dental service they can still be referred to Locala Dental Care.

## Intermediate Care Beds

<b>Service: Intermediate Care Beds</b>	
<p><b>Service overview</b></p> <p>Intermediate care is an umbrella term for a range of services that deliver short term care, support or rehabilitation to patients who have suffered a sudden onset of ill health.</p> <p>We bridge the gap between hospital and home, helping patients recover more quickly, so that they can cope in their own home and so prevent unnecessary admission to hospital or premature admission to long-term nursing or residential care.</p>	
<b>Contact details</b>	<p>Moorlands Grange - Spruce Drive, Netherton, Huddersfield, West Yorkshire, HD4 7WA. 01484 660010 Locala team - 030 333 09799</p> <p>Ings Grove House - Doctor Lane, Mirfield, West Yorkshire, WF14 8DP. 01924 489324 Locala team – 03330 436245</p>
<b>Service locations</b>	Within Locala we have two 30 bed rehabilitation centres, Moorlands Grange in Huddersfield and Ings Grove House in Mirfield. We also have nursing beds in South Kirklees
<b>How to refer</b>	<p>Single Point of Contact 0300 304 5555</p> <p>E-Referral: <a href="https://www.locala.org.uk/your-healthcare/ereferrals-home/">https://www.locala.org.uk/your-healthcare/ereferrals-home/</a></p>
<b>Referral Criteria</b>	Patients must meet <u>all</u> the following criteria in order to be deemed suitable for admission to an IC bed;

- The patient must be registered with a Kirklees G.P and live in the Kirklees area (Details of the GP Practice and name of the patients' individual GP must be available for screening prior to registering the patient for the waiting list to transfer);
- The patient requires a period of nursing and/or therapy assessment and monitoring that cannot be delivered in their normal place of residence;
- Patients must be declared by their GP (Step up Patients), consultant (step down patients) as medically stable.
- Patient must be willing to participate in an active rehabilitation programme.
- At point of referral, patients must be capable of transferring with 1 – 2 staff using a mobility aid, or anticipated to achieve this within 10 - 14 days admission. This decision must be based on identified progress whilst in the acute setting. Variations outside this may considered on an individual basis with discussion with the referrer and the therapy team receiving the patient
- Next of kin have been informed of the possible transfer to a Kirklees Intermediate care bed.
- Clear goals have been agreed with the patient and it is clear to the Patient and their family/carers that these will be used as a starting point on transfer to an IMC bed;
- At the point of transfer the patients predicted date of discharge will be a maximum of 28 days after transfer and that this has been explained to the patient and carers / family;
- The patient has made informed consent to the transfer and this is documented in their notes.

	<ul style="list-style-type: none"> <li>• Patient with a secondary diagnosis, which is low level or moderate dementia, who either have the capacity to engage in a programme of rehabilitation or whose future care needs are uncertain.</li> <li>• Patients accepted dependant on the acuity of the patients already on the units. Therefore enabling safe care for all</li> </ul> <p><b>Exclusion Criteria</b></p> <ul style="list-style-type: none"> <li>• Patients who are medically unstable;</li> <li>• Patients who have a primary diagnosis of a mental health problem;</li> <li>• Patients who are unable to give consent to rehabilitation;</li> <li>• Patients who do not have a rehabilitation/nursing care plans in place;</li> <li>• Patients who have challenging/violent behaviour;</li> <li>• Patients who require specialist equipment which is not available on the IMC unit</li> <li>• Patients with problems of a purely social nature;</li> <li>• Patients whose needs can be met in the community.</li> </ul>

### Looked after Children

<b>Service: Looked After Children</b>
<p><b>Service overview</b></p> <p>Our specialist nurses work with children and young people, from birth to 25 years old who have become looked after by the Local Authority. Nurses are co-located with the Local Authority and Social Workers to support a multi-disciplinary approach.</p> <p>The aim of the service is to promote health and wellbeing and to enable access to universal services. The service provides:</p> <p>Initial health assessment when a child becomes looked after</p>

6 monthly or annual review health assessment in conjunction with Health Visitors and School Nurses.  
 Individual advice and support within Childs home, Foster placement, Residential Homes and others.  
 We are part of the Vulnerable Children's Unit which also incorporates the Youth Offending Team and the Pupil Referral Service.  
 Support through referrals and sign posting to other services.  
 An advocacy role on behalf of the young people.  
 Work alongside the Sexual Health Outreach Worker and CRI (Substance Misuse) specialists to ensure appropriate access and support.  
 Work closely with Family Nurse Partnership to support vulnerable pregnant teenagers.  
 We offer training and support to foster carers and residential staff.  
 We provide a shadowing service for other professionals.  
 We work in conjunction with others both locally and nationally to identify and address the health needs of Looked After Children, placed out of their home area.

The individual Looked After Children Nurses have specialist roles covering; Children with Complex Needs and Disabilities, Young People Leaving Care and the Strategic Overview of Kirklees Looked After children which feeds into the Local, Regional and National agenda.

## PHEYS

<b>Service: Calderdale PHEYS</b>	
<b>Service overview</b>	
<p>The Calderdale Public Health Early Years' Service provides: Health Visiting, Oral Health and Breastfeeding Support to families of children aged 0-5 years across Calderdale.</p> <p>Our high-quality, holistic approach means our services are accessible for all these families, bringing about a consistently efficient and effective response to your young child's healthcare needs.</p>	
<b>Health Visiting</b>	
<p>Each family has a named Health Visitor who, if the family wishes, acts as a care co-ordinator and a single point of contact between the family and any other health and social care professionals who are providing support. This helps families understand the roles of the various professionals in creating a seamless care plan and avoids duplication. Your Health Visitor works directly with your whole family to make sure you are supported consistently and with guidance are able to take ownership of your family's health and health goals.</p>	
<b>Contact details</b>	0303 304 5076
<b>Service locations</b>	<p>Our Health Visitors and Breast Feeding Peer Supporters work in teams to cover the whole of Calderdale via these localities:</p> <ul style="list-style-type: none"> <li>• Upper Valley</li> <li>• Central Halifax</li> <li>• North and East Halifax</li> <li>• Lower Valley</li> </ul>
<b>How to refer</b>	<p>GP and other health or social care professional may refer to a Health Visitor and you can contact the service directly.</p> <p>All services are available 8.30am to 5.00pm Monday to Friday.</p>
<b>Referral Criteria</b>	Health visitors work with all families with children under 5 years who live in Calderdale

## Podiatry

<p><b>Service: Podiatry</b></p> <p><b>Service overview</b>          Podiatry has a standard access criteria which means that, following assessment, we may find that a patient is not eligible to receive Locala Podiatry care.          If you are not eligible for care, patients will be signposted to self care or other foot care providers. Initial assessment may be a telephone or face to face consultation, where we will assess the patient's needs for the service.</p> <p>We provide the following services :-</p> <p><b>Core Podiatry</b>          Those eligible for core podiatry are seen for the management and treatment for corns or callus alongside foot health advice and education in self-management.</p> <p>NB – If the patient does not have a medical condition which puts their feet at risk then nail care will not be offered by Locala Podiatry</p> <p><b>Biomechanics</b>          Biomechanics in podiatry is the assessment of the lower limb and foot.          The Biomechanics Team may provide help to people who suffer with lower back, knee and generalised foot and ankle pain.          A typical appointment may include gait analysis and assessment of the lower limb and foot.          Treatment could include advice in relation to stretching, footwear, lifestyle and the provision of insoles.          Should treatment not be successful through the Podiatry Biomechanics Team onward referrals can be made to appropriate services.</p> <p><b>Nail Surgery</b>          We provide corrective nail surgery for ingrowing and/or curved painful toenails, involving removal of part of, or the whole of the nail.          An initial assessment will be carried out to decide whether surgery is the most suitable option. This will include a review of medical history and current medication. Some patients may not be suitable for this procedure.          Surgery will be carried out under local anaesthetic and will usually involve destruction of the nail matrix to prevent regrowth of the nail. If the patient decides nail surgery is not for them, then other options will be discussed. This will usually involve self care advise, or conservative treatment by other nail care providers.</p> <p><b>Diabetes</b>          We carry out diabetic foot assessments for those patients that have previously been assessed as being at risk of developing foot ulceration by their GP practice.          We assess the feet to determine whether there is diminished sensation and / or arterial insufficiency by checking the pulses in the feet to see how well the blood</p>
--

is circulatory. A general foot assessment to check for any foot deformity, corns or calluses which may affect the feet will also be performed along with advice on self care management.

**Wound care**

Locala Podiatry provide care for wounds to the Foot

<b>Contact details</b>	Locala Single Point of Contact 24 hours a day, 7 days a week on - <b>0300 304 5555</b> .

## START

<b>Service: START</b>	
<b>Service overview</b>	
<p>START is dedicated rapid response team of nurses, therapists and health care assistants who work with patients to prevent unnecessary admission to hospital, and when patients are ready to return home from a stay in hospital, the team will ensure the correct support is place to reduce the risk of re-admission.</p>	
<b>Contact details</b>	<p>Single Point of Contact 0300 304 5555</p>
<b>Service locations</b>	<p>We work in the community in north Kirklees based at Eddercliffe and south Kirklees based in mill hill. A holistic assessment is completed within the patient's home to aim to maintain them in their own home with provision of equipment, care and physical therapy. START also a base at Dewsbury &amp; District Hospital A&amp;E. START complete a holistic assessment to assess if they are suitable for discharge home, and support that discharge home by setting up care and providing equipment. START meet daily with the acute care of the elderly unit and frailty within hospital to support the discharge of patients home or to another care setting.</p>

	<p>At Huddersfield Royal Infirmary we work with the Frailty Team to support discharge and follow up patients in the community to reduce the risk of readmission and provide support to A&amp;E to identify patients that can be maintained at home safely.</p> <p>START support rapid discharge element of hospital discharge with members of the team dedicated to this role. Clinicians involved with this service triage incoming referrals from acute trusts for community services. Furthermore, they triage referrals to reablement, and rehab beds to speed up the process of discharging patients from the acute trust. This also involves face-to-face assessments with patients and working closely with members of the MDT within the acute trust.</p>
<p><b>How to refer</b></p>	<ul style="list-style-type: none"> <li>• Telephone 0300 304 5555</li> </ul>
<p><b>Referral Criteria</b></p>	<p>Referral is accepted on the following basis:</p> <ul style="list-style-type: none"> <li>• The patient consents to the referral</li> <li>• The individual must be medically fit to remain/go home and have been assessed by a GP/Medical Professional/Community Matron/Paramedic within the previous 48 hours with no medical changes since.</li> <li>• The referrer understands that the assessment and intervention for a 0-2 hour response is undertaken by a community nurse/therapist and interventions will be within their scope of practice and competency</li> <li>• Their GP is within the Kirklees area and they are in their usual place of residence</li> <li>• Carer breakdown when related to an acute medical event</li> <li>• The patient has been in hospital less than 72 hours</li> </ul> <p>The types of conditions or situation that are considered as appropriate for START include:</p> <ul style="list-style-type: none"> <li>• Falls without obvious injury, decreased mobility</li> <li>• Falls referrals from YAS (to be seen within 24 hours).</li> <li>• Pain that has a diagnosis and pain management plan in place</li> <li>• Acute onset infections which the GP has documented a plan of care:- Urinary tract infection, respiratory tract infection, cellulitis</li> </ul>

	<ul style="list-style-type: none"> <li>• A short term crisis/change in condition where the patient is not managing to self-care, which can be maintained safely at home with a temporarily increased package of care, maximum 2 weeks, which includes provision of equipment</li> </ul> <p><b>Exclusion Criteria</b></p> <ul style="list-style-type: none"> <li>• Medically unstable,</li> <li>• Head injury,</li> <li>• Sudden onset of acute delirium with no diagnosis</li> <li>• GP not willing to retain medical responsibility,</li> <li>• Patient refuses consent,</li> <li>• Respite is required</li> <li>• Where the major reason for referral is a drug or alcohol related problem, requiring mental health input.</li> <li>• This service does not support individuals with long term home care needs. If ongoing home care is required this is discussed with the individual and a referral to social services is made by the referrer via Gateway to Care.</li> <li>• Palliative patients will remain with the ICCT's to ensure specialist care and support is received and enable continuity of care.</li> </ul>

<b>CQC Rating</b>	Good

### Whitehouse Practice

<b>Service:</b> Whitehouse GP Practice	
<b>Service overview</b>	
<p>The Whitehouse Centre is a GP surgery caring people who have difficulty accessing and using mainstream GP services. We register people for at least a year.</p>	

We can register patients that live in Greater Huddersfield and are:

- Homeless or in emergency accommodation
- A person seeking asylum

Our team is friendly and helpful. We aim to help with problems which are affecting your health. This includes housing, benefits, social problems and asylum and immigration. We understand that life can be complicated and stressful. We know that many of our patients have experienced great losses and trauma and may be struggling with their feelings and mental health. We partner with many agencies and people involved in supporting people who have difficult situations.

We offer telephone, video, e-consultations and face to face appointments. We are usually able to reply to your request very quickly, especially by telephone and by using a special SMS system. Face to face appointments are used for problems which are very complicated and cannot be sorted out on the telephone.

If you do not speak English, we are able to use telephone interpreters. If you have a disability we will accommodate your needs.

We offer all the same care you can expect in mainstream general practice. In the UK, general practice is where you go first for non- emergency care. GP teams will take each problem and decide how to take it forward.

When you have been registered for us for more than one year and when your health care is stable, we may ask you to move on to a new practice.

If you want to become involved in influencing and supporting the practice, we have a patient participation group you can apply to join. We have many ways you can use to give us feedback to improve our care.

<b>Contact details</b>	0333 043 6243
